

Jackie Pagano,
Animal Care Specialist

SADLY, WE HAD TO SAY GOODBYE TO SADIE AFTER JUST A SHORT TIME AT WOLF HAVEN. SHE SUCCUMBED TO A HEMANGIOSARCOMA (CANCER OF THE BLOOD VESSELS) IN HER CHEST, BUT WE ARE EXTREMELY GRATEFUL THAT SHE DID NOT APPEAR TO BE SUFFERING FROM THIS AILMENT.

Sadie was one of our newer residents, rescued in February to be a companion for 16-year-old London. Sadie turned 14 this April, making the pair well matched in age. Although the two were considered geriatric, Sadie brought with her a wave of new life for London. His overall demeanor and spirit perked up with the arrival of a new friend, and the two bonded almost instantly.

They spent most of their days lounging under the canopy of the large oak trees, London always keeping very close to Sadie. While she was very trepidatious upon first meet, Sadie was an extremely sweet individual once she warmed up to someone, and she was always excited to be paid a visit. Sadie was always excited when food was being distributed too. She was one of the sanctuary's biggest fans of the various meaty popsicle flavors, made by the animal care team to help the wolves combat the warmer temperatures.

Sadie was not with us for a long time, but her adoring personality left a lasting impact on those of us who had the privilege of caring for her. 🐾

**Lovely sweet Sadie
enjoying a meaty snack.**

Julie Lawrence.
